
PORSA LET

Il sistema modulare componibile "PORSA LET" è una soluzione estremamente pratica per la realizzazione di scaffalature murali, divisorie attrezzate, etc. Offre la possibilità di regolare la posizione delle mensole a qualsiasi altezza semplicemente facendole scorrere nel profilo "guida", superando così il sistema del tipo a "cremagliera".
Le stesse possono essere montate anche nei sistemi: "PORSA A e PORSA T", diventandone una utile integrazione.

PORSA LET - Mensole a muro

PORSA A + PORSA LET - Parete attrezzata

PORSA LET - Mensole a muro

PORSA A + PORSA LET - Posto di lavoro attrezzato

Profilo guida in alluminio estruso
(lunghezza barre mm 6000)
