- Suitable as well for newly built houses as for renovations

**OFFICIALLY
TESTED BY
ITB**

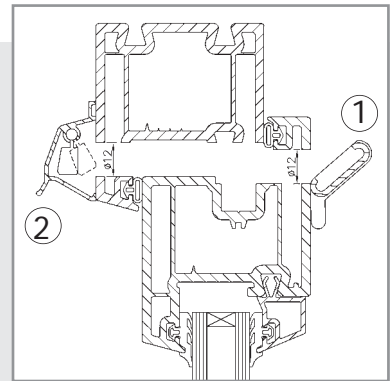

AEROVENT

To keep your building in good health and to guarantee a good indoor air quality, you need to ventilate permanently. Just opening your windows and doors is not the right way of ventilating. By doing this, you are not only wasting a lot of energy and money. But you have also a high risk for water and insects entering the building, as well as burglars. RENSON offers you the perfect alternative for ventilation. Our discreet window ventilators are very energy efficient and sustainable.

AEROVENT is the latest innovation in the RENSON slot vent range. This aluminium slot vent can easily be installed on PVC, timber and aluminium windows and is suitable as well for newly built houses as for renovations.

AEROVENT has officially been tested by „Instytut Techniki Budowlanej“ in Poland, with an excellent result for the condensation tests. The official ITB Nr. is AT-15-6606/2005.

① Inside profile :

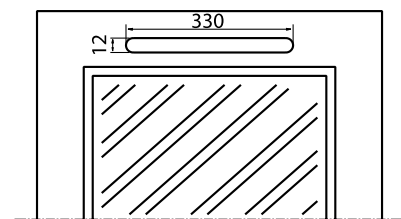

- Aluminium profile with PVC endcaps.
- Powdercoated in all RAL colours, standard RAL 9016 white and 8019 dark brown.
- It directs the incoming air upwards and avoids any draughts.
- Available with manual control or cord control.

② Outside profile :

- Aluminium profile with PVC endcaps.
- Powdercoated in all RAL colours, standard RAL 9016 white and 8019 dark brown
- It is selfregulating : that means that independent from the weather conditions, it brings a permanent airflow without any draughts.
- It disposes of an anti-insect mesh.
- It is watertight until 600 Pa (in closed position, with infiltration 5 m³/h).

Inside profile length	outside profile length	slot size	airflow m ³ /h – 10 Pa
400 mm	375 mm	330 x 12 mm	21
